

Google Search 2-books of the Chosen Scientist  
and read minimum 10 reviews of it

After reading several customer reviews on Amazon on Fred S Singer's books, "Not talks, Cold Science: Global Warming's Unfinished ~~the~~ Debate" and "Unstoppable Global Warming: Every 1500 years,". It is clear that customers have considered these books engaging towards the climate change debate.

With that being said, "Not talks, Cold Science", is rated 4.7 out of 5. It is a virtue of a person to like a certain section of books. As far as the reviews, the book has its own audience which are generally researchers, environmentalists & ~~social~~ green social workers. The book is recommended to the experts, not rookies because it contains certain terminologies which could trouble a non-expert. The most significant thing about the book turns out to be the use of scientific methods in climate change as most significantly reviewed by users.

Same flow

In the ~~first~~, Fred S Singer's another bestseller, "Unstoppable Global Warming", written by him and Dennis T Avery is rated 4.7 out of 5 on Amazon. Surprisingly, there are no reviews & ratings from India. And then they ~~say that~~ ask, "Why Indian mentality is not changing", moving forward on our reviews, the ~~can~~ book can be described as an account of extensive research considering data from several sources. The reviewers describe this book informative ~~the~~ because of the extensive research written in the book. The reader says that the book gives several explanations of climate change, natural climatic cycles. At last, the conclusion is that, their argument on the 1500 year cycles of climate control can be disrupted by human activities.
